

JOÃO RIEDO

Product Designer | Design Systems & Applied AI

Londrina, PR — Brazil | joaoriedodesign@gmail.com | +5543984121348 | [linkedin.com/in/ri3do](https://www.linkedin.com/in/ri3do)

Portfolio: joaoriedo.com

SUMMARY

Product Designer with 5+ years of experience, specialized in Design Systems and end-to-end product design for complex B2B/B2C multi-tenant platforms. Architects scalable design systems — primitive-to-semantic tokens, component libraries, per-tenant theme automation — and works closely with Engineering through clear handoff and design-to-code practices. Uses AI natively in the workflow, with Claude and MCP workflows (Figma MCP, Notion MCP) daily for research, documentation and iteration. Comfortable driving ambiguous problems end to end, from discovery and hypothesis validation to high-fidelity execution.

SKILLS

Design & Systems: Design Systems, Design Tokens (Primitive to Semantic), Multi-tenant Theming, Component Libraries, High-Fidelity Prototyping, Interaction Design, Dev Handoff

Applied AI & MCP Workflows: Claude (daily use — research, documentation, rapid iteration), Figma MCP & Notion MCP, Claude for Designers Certification

Discovery & Research: Hypothesis-Driven Discovery, Competitive Benchmarking, UX Research, Journey Mapping

Tools: Figma (Auto Layout, Components, Variants, Design Tokens), Storybook, Notion

Domain: B2B/B2C Multi-tenant Platforms, Payment UX, Operational Tools and Documentation

Languages: Portuguese (native), English (advanced)

PROFESSIONAL EXPERIENCE

Product Designer

Feb 2026 – Present

Multibet

- Owns end-to-end product design on a complex B2B multi-tenant platform — from discovery to production-ready UI — using Figma MCP and Notion MCP as part of a daily AI-native workflow with Claude.
- Leads the Design Tokens audit and the structured migration of component libraries to the Supernova Design System, working directly with Engineering (Figma to Storybook) to ensure clear handoff and design-to-code consistency; architected a multi-tenant token system (primitive to semantic, per-tenant theme automation) that now powers 87 screens and 200+ components across 3 tenants — cutting the time to create new screens by about 80%.
- Ran discovery and built a hypothesis matrix for an expiration problem in a payment method, validated with competitive benchmarking across two markets, to reduce friction in the payment journey.

UX Designer

Apr 2025 – Dec 2025

Ana Gaming (Cassino.bet / 7K.bet)

- Led the full redesign of the Cassino.bet sportsbook experience, from the betting flow to the final interface, aligning decisions with business and engineering stakeholders.
- Laid the initial foundations of a unified, multi-tenant Design System, later evolved at Multibet.

Work and Travel

Dec 2023 – Mar 2024

Alterra Mountain Company — United States

- International exchange program focused on improving English.

Design Supervisor

Sep 2020 – Jul 2023

Instituto ESPE

- Led and managed the graphic and digital design team, establishing processes and visual consistency standards.

SELECTED PROJECTS

Multi-tenant Design System

Design System — Multibet

- Structured the token architecture (primitive to semantic) and a per-tenant theme automation layer, replacing scattered, outdated Figma files with a single source of truth.
- Result: 87 screens and 200+ components consumed directly from Storybook across 3 tenants; time to create new screens reduced by about 80%.

Instituto MAIS — institutomaislondrina.com.br

Institutional Website — Multidisciplinary Clinic

- Designed and built the website for a clinic in Londrina with seven specialties (psychology, educational psychology, neuropsychology, pilates, among others), organizing content by specialty, life stage and team.
- Structured the page for WhatsApp conversion, with direct booking per practitioner, and handled local SEO (medical clinic structured data, Open Graph), paid media tags, light/dark theme and accessibility.

Zentupet

Management SaaS — Solo Project

- Designed from scratch a management SaaS for pet daycares and hotels, covering the pet's entire journey on site — check-in, activities, medication, bath and grooming, through check-out.
- Single-handedly ran the market research and designed the 14 product screens, the components and a design system built from scratch for two user profiles: facility staff and pet owners.

EDUCATION

Bachelor's Degree in Graphic Design

2020 – 2022

UniFil — Centro Universitário Filadélfia

Integrated Technical Degree in Information Technology

2015 – 2018

IFPR Londrina (Federal Institute of Paraná)

CERTIFICATIONS

Google UX Design Professional Certificate

Google (Coursera)

- Foundations of User Experience (UX) Design
- Start the UX Design Process: Empathize, Define, and Ideate
- Build Wireframes and Low-Fidelity Prototypes
- Conduct UX Research and Test Early Concepts
- Create High-Fidelity Designs and Prototypes in Figma
- Build Dynamic User Interfaces (UI) for Websites
- Design a User Experience for Social Good & Prepare for Jobs

Claude for Designers
